

ALBERDINGK® AC 2570

ACRYLIC

DESCRIPTION

AC 2570 is an acrylic designed to modify a coating formula for improvement in re-emulsifiability for easier cleaning of conveyer belts and spray guns. This makes it ideal for UV-curing systems using LUX products and/or in ink systems where cleanability is key.

FEATURES

- Improves re-emulsifiability
- Blending resin for UV-curable and ink applications

TYPICAL PROPERTIES

NVW (%)	40
pH	3.5
Visc (cps)	25
MFFT (°C)	25

APPLICATIONS

UV curable systems
Ink applications
