

## ALBERDINGK® M 2001

### DESCRIPTION

M 2001 is a high solids styrene acrylic opaque polymer. It is recommended for printing ink to improve ink transfer and to reduce pigment concentration for hiding.

### FEATURES

- Cleaner and brighter inks
- Excellent substrate hide without tinting

### TYPICAL PROPERTIES

NVW (%)	54.5
pH	8.4
Visc (cps)	500
MFFT (°C)	59
Tg (°C)	59

### APPLICATIONS

paper  
inks  
kraft
