

## ALBERDINGK® M 2064

### DESCRIPTION

M 2064 is a low Tg styrene acrylic emulsion with excellent adhesion to treated films such as polypropylene, polyester, or polyethylene. It provides good gloss plus resistance to water, grease, and block.

### FEATURES

- Excellent water resistance
- Adhesion to flexible metals

### TYPICAL PROPERTIES

NVW (%)	48.5
pH	8.5
Visc (cps)	600
MFFT (°C)	-24
Tg (°C)	-24
Solvent (%)	1.5

### APPLICATIONS

plastic films
