

ALBERDINGK® M 2954

TALL OIL RESIN-SUPPORTED ACRYLIC EPOXY HYBRID

DESCRIPTION

M 2954 is a self cross linked epoxy acrylic hybrid with a very high surface hardness making it ideal as blending resin to impart high performance properties. It has good adhesion to metal and cement, and can provide a wet look on concrete or brick substrates.

FEATURES

- High Tg - ideal for blending
- Excellent water resistance
- Chemical resistance

TYPICAL PROPERTIES

NVW (%)	46.5
pH	8.7
Visc (cps)	400
MFFT (°C)	78
Tg (°C)	75

APPLICATIONS

metal
cement
wet look
