Product Information
Alberdingk® AS 2065 VP

What is the resin's nature?
Aqueous polymer dispersion based on acrylic acid esters and styrene.

Technical data:
- Solids content: 46 - 48%
- pH-value: 7.0 - 9.0
- Viscosity: 20 - 200 mPas
- MFFT: approx. 27°C

Why has the resin been developed?
This dispersion is very compatible with cement and mortar to rise the mechanical properties.

What is the suggested field of application?
- Building emulsion
- Fillers, putties
- Industrial floors
- Screeds
